

HD Bed

Special Padded care bed for patients with Huntington's Disease and other patients with a similar need for protection against self-harm in sleeping situations.

The HD Bed consists of a robust bed frame made from solid beech wood with padding on all sides and edges. Furthermore, the side sections have a rubber padding, which protects the user on entry and exit and when the side sections of the bed are open.

The side sections open/close via an easy-to-use central closing system.

The head of the HD Bed can be elevated, and the bed has a four-part support surface.

The HD Bed has a built-in elongation of the support surface at the head and foot sections of the bed as well as a central brake system.

Model 800

Outer measure: 94 x 218 cm
Inner measure: 80 x 210 cm
Side section: 35 cm
Height adjustable: 46 – 84 cm

Model 801

The mattress consists of a 6 cm Tempraflex top part and 7 cm fire-resistant polyether foam upholstered with incontinence padding.
